

Good day.

An appeal to a parent.

If you love your children, let them think for themselves. Don't send them to school for there they will lose their riches which they obtained from God at birth.

State education will effectively select his brain from what God gave him at birth.

You can decide whether to send your child to school or not.

To make this decision easier for you, let me tell you a few things.

First, the Ministry of Education is your servant, not you his servant, because you pay taxes and with your money they do what they want, so you have the right to control what they do.

Second, you can educate your children as you wish, not as the government wishes.

The government wants you to educate your child so that he works for the government and pays taxes.

Just because you do this all your life doesn't mean your child has to do it too.

So you make the decision about your child's future. Remember what you were taught in school and remember if what you were taught there was useful to you in life how you took advantage of it. So don't let your baby experience the same stresses.

Another thing. Why am I saying this to you? I say this to you so that you know the truth hidden for many thousands of years by the so-called wiser people, from the commoners that is, in front of you. If you are among the commoners, because they have classified you so much as the commoners, then the highest time for you to start thinking for yourself, not like they tell you. The truth is, that God is mind, the universe is mind, not matter, and he created it by means of thoughts everything you see around you. Likewise, you can create whatever you see around you.

You can change and create as you want. They hid the truth from you so that you would he did not know your great creative power. So that you don't threaten them in their plans.

So make your plans. You have the ability to create your own parallel universe and use it. Cut yourself off from these false manifestations of the physical world, and just build on your plans. What you want, not what they want.

See what the outside world looks like. It looks like they want you to do physical labor on them, he provided them with taxes so that they could wage wars, because there would be no selection.

It's a lie. God or unlimited awareness is so unlimited, that he can create any number of goods. There are enough goods for everyone. Don't believe these lies that something is missing. In God's consciousness it is inconceivable to anyone something his sons were missing. You are his son, so take advantage of the fact that with your thoughts, his thoughts. I have not told you yet that God is only and exclusively, God is only and exclusively the author of all the thoughts that are in your so-called mind.

You think it is your mind. Not. This is the mind of God. The mind of God permeates the entire universe, all space and we are all immersed in it. So that all thoughts are made by God, and you have free will, which is just free to choose any idea you want what he sends you. Take advantage of it. Tell your children that they don't listen to people, who will lead them to the potty. There will be your hand or his hand only that they would listen only to the voice of God, which is within him and within you.

That is, in the subconscious. That would be enough on this beautiful morning when the sun is shining and the air is so refreshing that it never occurred to me to put on a jacket. I'm in a shirt and that's what I can do what I like.

Thank you. I wish you happiness and joy.

This is an interesting initiative. Discovering new things about yourself and the world, logical and creative thinking, solving problems together, learning the basics of technology, robotics for older children, weekly or one-time activities. There is hope that these children will not lose the treasure of God.

Good day.

Advice for parents.

Listen to your children. Not that you obey it, they say it, just listen and pay attention to what the children say and how they behave. If your child expresses reluctance to go to school, it is not his whim, it is not a sign of laziness, but a sign wisdom, because it accepts ideas from God, and that is exactly what it chose.

Not to go to school because at school they will teach him all the bad things they have taught you. That is why God shows him the way not to listen to people, but to listen to God.

So this the voice that is inside him. If you ignore that voice and listen to people, it is your decision.

You have free will, but your child also has free will, that is, God's will and he accepts these ideas because it is not yet permeated with the physical world, the manifestation of which it is a lie of people who know the truth. When you go for a walk with your baby then do not pay attention to him that you must not, you must not there, do not do this, do not do that, just watch it and learn from it, because it is, it behaves spontaneously and doesn't care what is outside, only it begins to build its inner world using from God's mind. Since you already know that there is only one mind, man has no mind of his own.

The mind is only one all-encompassing, omnipresent mind of God, and He directs the actions your child. You are guided by what you hear from people. Regulations, prohibitions, permits, or not permits. You have your beliefs that you have acquired from your parents and your subconscious mind, in which God exists, in your subconsciousness has your beliefs written down and follows your beliefs. The child has no human beliefs yet, yeah that he is following divine beliefs. Let him do it. Observe how many good things you can learn from your child. If he or she goes to school, tell him anyway, if you want him not to listen to what the teacher says. if it is the obligation to go to school, it should only be to have a presence, because how he will have no presence, there will be consequences independent of you and independent of you again from him. Since your child. You can enter into a friendship with him and ask every time what did your teacher tell you? You will have a great excuse to talk to your baby.

If your child tells you what is happening at school, here I will remind you of the idiotic ones folk proverb "Even if they fry you in tar, do not say what is happening at school".

It's a lie. You just should know what the teachers are teaching your child.

Take an interest in it and correct your child. Be his lecturer. If you don't know how to talk to a child, I don't know what to do. Maybe use my videos maybe use other teachers you trust who know what they teach, because the teachers in the state school teach what the government tells them to do. And you know what the government is telling them to do.

Therefore, I am paying attention once again to the fact that you do not rebuke, admonish and forbid nothing to your child, he just watched and learned from him himself.

Thank you.
